

Geo-Seas: online delivery of harmonised marine geoscience data from across Europe

Wednesday, 14 March 2012

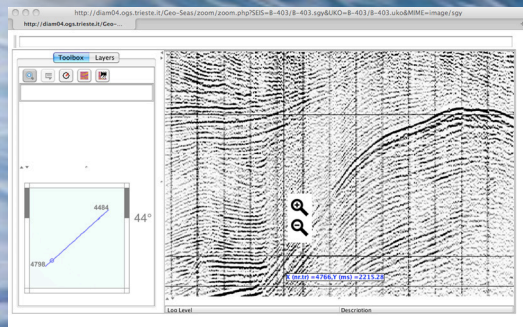

13:30 – 17:00

Oceanology International 2012
South Gallery, Excel Centre, London

Geo-Seas: an online data discovery and access service delivering harmonised marine geoscience data from 26 European data centres.

A dedicated portal providing access to more than 60,000 marine geological and geophysical data sets.

A suite of data visualisation tools for viewing high resolution seismic data, 3D digital terrain models (DTM) and borehole logs.
